EDUCATION

Moringa school | SOFTWARE ENGINEERING BOOTCAMP

May-November, 2022

Jomo Kenyatta university of Agriculture and Technology | BACHELORS OF SCIENCE IN INFORMATION TECHNOLOGY
January, 2017-December, 2021

Tiengre secondary school | KENYA CERTIFICATE OF SECONDARY EDUCATION February, 2012-November, 2015

EXPERIENCE

software Developer | Moringa school

May 2022 - November 2022 | Nairobi/Remote

- Reviewed and implemented user interface designs.
- I closely worked with technical mentors to review and unblock code blockers.
- Developed projects that involved major application developments.
- Led a team as the scrum master to implement and develop a full stack application.

Key Accomplishments:

- Was the scrum master for final project, I led my team to production of a full stack application through effective communications and merging the branches.

Software Developer/Web developer freelancer | freelancing

February 2021 - March 2022 | online

- Developed and implemented web applications.
- Analyzed different alternatives for hosting of applications and websites.
- Conducted testing & validation to ensure web pages conform to regulations and policy.

PROJECTS

Book title-Application - <https://bookk-review-app.herokuapp.com/book>

Book application displays book covers and short descriptions, it uses search filter to search for a book title from an external API. The technologies used are React, JavaScript, and CSS with external APIs.

Weather Application - <https://domooh9.github.io/weatherApp/>

An Application built using HTML, CSS, and vanilla JavaScript that displays weather of different world cities, it has a search bar where you key in the city you want weather information of.

iReporter application - <https://ireporterapp.vercel.app/>

iReporter is a collaboration full-stack application built using React and Ruby on Rails in a group of five team members, it allows users to create an account, log in, and create an incidence(red flag or interventions), the admin can view all the reported incidences, and act upon them.

Blog application - available on gitHub (<https://github.com/domooh9>)

A full stack application that allows users to create account and post a blog relating to technology and software development, technologies used: React, Bootsrap, CSS, Ruby and Sinatra.

React-chatbot - available on gitHub (<https://github.com/domooh9>)

Question and answer bot that explains to users about software development.

SKILLS

- Frontend development : JavaScript | React | Redux | HTML | CSS/Tailwind | Bootstrap | figma
- Backend development : Ruby | Rails(Restful APIs) | PostgreSQL | Python | PyTorch
- Comfortable in GNU+Linux | Docker | Git/gitHub
